Denver, Colorado

SUMMARY

Enthusiastic engineering student eager to contribute to sustainable technology advancements. Skilled in MATLAB and SolidWorks, with a strong foundation in data analysis and lab maintenance. Aspires to innovate in laboratory settings and contribute effectively to engineering research.

EXPERIENCE

Engineering Lab Intern

01/2026 - 01/2026

Advanced Engineering Technologies

Denver, CO

- Assisted in the design and setup of electrical circuit experiments, achieving a 20% increase in testing efficiency.
- Documented and analyzed experimental data using MATLAB, enhancing data accuracy by 15% for future research.
- collaborated with senior engineers on troubleshooting experiment setups, leading to a 30% reduction in downtime.
- Maintained calibration schedules of over 50 lab instruments, ensuring 100% compliance with safety regulations.
- Compiled research findings into detailed reports, which improved lab operational strategies by 10%.
- Utilized analytical skills to enhance system performance, reducing errors in documentation by 25%.

Team Project Coordinator

01/2025 - 01/2025

University Engineering Society

Denver, CO

- Led a team of 5 on a project developing a solar energy prototype, which won 2nd place in a statewide competition.
- Managed project timelines and resource allocation, ensuring on-time delivery of all project milestones.
- Facilitated weekly team meetings to brainstorm innovative solutions, fostering a collaborative environment.
- Utilized AutoCAD for design planning, improving model precision and reducing iteration cycles by 20%.

EDUCATION

Bachelor of Science in Mechanical Engineering

01/2023 - 01/2026

University of Colorado Boulder

Boulder, Colorado

VOLUNTEERING

Community Workshop Facilitator

Engineers Without Borders USA - Denver Chapter

01/2025 - 01/2025

Organized and led workshops to teach basic engineering principles to underserved youths.

- Facilitated a series of 6 educational workshops, engaging over 50 participants in hands-on projects.
- Collaborated with volunteer engineers to develop programs focused on renewable energy education.

LANGUAGES

|         |          |       |

| Spanish | Advanced | ●●●●● |

SKILLS

MATLAB · LabVIEW ·

Microsoft Office Suite · SolidWorks ·

AutoCAD · Data Analysis

TRAINING / COURSES

Introduction to MATLAB Programming

Offered by Coursera, obtained in 2025.

Sustainable Engineering Practices

Completed at edX, issued in 2025.

Advanced AutoCAD Techniques

Certification received from LinkedIn Learning in 2025.

INTERESTS

Renewable Energy

Dedicated to exploring innovations in renewable energy, including solar power and sustainable technology.
