

ZOE THOMPSON

Engineering Student Intern | CAD Modeling | Sustainability

+1-(234)-555-1234 Email [linkedin.com](#) Fort Worth, Texas

SUMMARY

Eager engineering student with expertise in CAD software, passionate about sustainable engineering solutions. Strong collaboration and analytical skills contribute to effective team environments. Aims to leverage engineering skills in innovative technology projects.

SKILLS

CAD Modeling, AutoCAD, SolidWorks, Data Analysis, Microsoft Office Suite, MATLAB

EXPERIENCE

Engineering Project Team Member

Austin, Texas

InnovateTech Group

03/2025 - 07/2026

- Led a cross-functional team to create a sustainable engineering solution, increasing energy efficiency by 15%.
- Applied CAD software to produce detailed design models, which facilitated prototype development and testing.
- Engaged in weekly meetings with engineers, analyzing data which informed strategic project adjustments.
- Developed comprehensive technical reports which supported key engineering decisions and refined project outcomes.
- Collaborated in a diverse team environment, enhancing communication skills to effectively convey technical insights.

Robotics Club Lead

Fort Worth, Texas

Emerging Tech Robotics

05/2025 - 10/2025

- Facilitated the design and testing of robots, resulting in improved accuracy of operations by 25%.
- Conducted research and compiled reports, contributing to the optimization of robotic functions and designs.
- Utilized MATLAB for simulation and data analysis to refine robotic parameters, enhancing reliability.
- Organized weekly hands-on sessions, fostering teamwork and communication among engineering students.

VOLUNTEERING

Technical Volunteer

Habitat for Humanity

08/2025 - 03/2026

Assisted in the technical aspects of sustainable housing projects.

- Coordinated with engineers to plan and execute construction tasks, improving resource allocation.
- Organized training sessions for volunteers, enhancing their technical skills to support project goals.
- Led a team in fieldwork to ensure effective implementation of sustainable building practices.

EDUCATION

Bachelor of Science in Mechanical Engineering

Austin, Texas

University of Texas at Austin

01/2022 - 01/2025

STRENGTHS

Analytical Problem-Solving

Effectively broke down complex problems to develop solutions, enhancing project outcomes.

Adaptable Communication

Communicated technical concepts clearly during meetings, aiding non-specialists in understanding project objectives.

Innovative Thinking

Conceived unique solutions to engineering challenges, fostering project advancements and optimizations.

INTERESTS

Sustainable Engineering

Deep interest in developing innovative, eco-friendly engineering solutions to combat climate change.

Robotics

Passion for designing and programming robots to solve real-world challenges and improve efficiency.

Computational Design

Fascination with the use of algorithms and software to create efficient, adaptable designs.
