

CHLOE MARTINEZ

VOLUNTEERING

Environmental Outreach Volunteer

Keep Fort Worth Beautiful

01/2024 - 01/2026

Participated in community outreach and educational programs to promote sustainable practices.

- Worked with a team to design and implement eco-friendly community activities.
- Developed educational materials for schools, directly reaching over 300 students.
- Facilitated workshops on sustainability, strengthening public awareness and community engagement.

EDUCATION

Bachelor of Science in Environmental Engineering

University of Texas at Austin

01/2023 - 01/2026 Austin, Texas

LANGUAGES

English Native ●●●●●

Spanish Proficient ●●●●●

SKILLS

AutoCAD · MATLAB · Data Analysis ·

Report Writing · Project Coordination ·

Sustainability Practices

INTERESTS

Renewable Energy Innovations

Passionate about advancing renewable energy technologies to foster a sustainable future for upcoming generations.

Engineering Student Research Assistant | Sustainability Enthusiast

+1-(234)-555-1234 @ Email linkedin.com Fort Worth, Texas

SUMMARY

Driven Engineering Student Research Assistant aiming to leverage academic knowledge and software proficiency to develop sustainable engineering solutions. Excels in data analysis, report preparation, and project documentation management with strong collaborative skills. Aspires to enhance these capabilities in a forward-thinking environment committed to eco-friendly innovation.

EXPERIENCE

Engineering Research Intern

01/2026 - 01/2026

GreenTech Solutions

Dallas, Texas

- Collaborated closely with a team of engineers to conduct research that supported over 5 ongoing projects in sustainable urban development.
- Organized and maintained project documentation, which improved data retrieval efficiency by 30%, aiding project managers.
- Assisted in the collection, analysis, and presentation of environmental data, leading to the unveiling of actionable insights.
- Supported engineers in the documentation and review of technical reports, sharpening attention to detail and improving the quality of output.
- Participated in the development of prototypes, performing initial testing that contributed to a 10% improvement in energy efficiency.
- Prepared technical reports and presentations summarizing research findings, enhancing team's understanding and decision-making.

Independent Research Project

01/2025 - 01/2025

University of Texas at Austin

Austin, Texas

- Conducted an independent research project on eco-engineering practices, resulting in a presentation to an audience of 50 peers and educators.
- Gathered and analyzed data from various sources, producing detailed reports that highlighted key insights into sustainable practices.
- Utilized MATLAB for data simulation, effectively illustrating environmental impact resulting from different construction methodologies.
- Managed project timelines and resources, reinforcing efficient collaboration skills across academic departments involved.

TRAINING / COURSES

Sustainable Urban Infrastructure by Columbia University

Columbia University, 2025

AutoCAD for Environmental Engineers

Coursera, 2024

Environmental Impact Assessment Techniques

EdX, 2025
