

JOSEPH WHITE

Engineering Trainee | Renewable Energy | CAD Modeling

+1-(234)-555-1234 • Email • linkedin.com • Charlotte, North Carolina

Summary

Enthusiastic engineering student with proficiency in CAD software and a passion for renewable energy solutions. Proven analytical and problem-solving abilities, evidenced through effective collaboration on cross-functional projects. Aims to leverage academic knowledge and hands-on internship experience in a dynamic engineering environment.

Skills

CAD Modeling • AutoCAD • Renewable Energy Systems • MATLAB • Data Analysis • Problem Solving

Experience

BrightPath Energy Solutions

Charlotte, NC

Engineering Intern

01/2025 - 01/2026

- Assisted in the design of a solar panel prototype increasing energy capture by 15% compared to existing models.
- Compiled comprehensive performance analysis reports for 3 ongoing projects to inform strategic decision-making.
- Supported troubleshooting efforts that resulted in a 10% increase in operational efficiency for faulty systems.
- Collected and processed data from 5 live systems monthly, enhancing the predictive accuracy of efficiency models.
- Facilitated weekly project strategy meetings which streamlined cross-team communication and project alignment.
- Developed CAD models using SolidWorks, reducing prototype error margins by 5% through precise simulations.

University of North Carolina at Charlotte - Energy Research Initiative

Charlotte, NC

Renewable Energy Project Collaborator

01/2025 - 01/2025

- Engaged in a university-led project designing wind turbines, contributing to improved blade efficiency by 12%.
- Partnered with a team of five to conduct comprehensive data analysis for sustainability research initiatives.
- Presented at two seminars showcasing innovative turbine design, enhancing peer understanding of renewable options.
- Collaborated effectively with diverse teams, enhancing project outcomes through strong interpersonal communication skills.

Volunteering

Green Earth Volunteers

Volunteer Energy Consultant

01/2024 - 01/2025

- Assessed household energy efficiency, recommending solutions to reduce energy consumption by an average of 20%.
- Organized and conducted workshops on renewable energy benefits, reaching over 100 participants.
- Collaborated with a team to implement a community solar garden initiative benefiting low-income households.

Education

University of North Carolina at Charlotte

Charlotte, NC

Bachelor of Science in Mechanical Engineering

01/2021 - 01/2025

Strengths

✔ Data Analysis

Conducted technical analysis for renewable systems, enhancing operational efficiency through informed strategies.

Communication Skills

Presented renewable energy solutions to diverse audiences at seminars, boosting awareness and education.

Team Collaboration

Led collaborative efforts in cross-functional teams, facilitating synergy and project completion within deadlines.

Interests

Renewable Energy Exploration

Fascinated by innovations that drive sustainable energy solutions and impact environmental change.

3D Modeling and Design

Enjoy crafting digital prototypes and simulating designs regarding their functionality and aesthetics.

Community Engagement

Committed to participating in local environmental initiatives and promoting community sustainability efforts.
