

LUKE ADAMS

Engineering Student Intern | CAD Expertise | Sustainability

+1-(234)-555-1234 Email linkedin.com Houston, Texas

SUMMARY

Driven Mechanical Engineering Student skilled in AutoCAD and data analysis, aiming to leverage cutting-edge engineering solutions for sustainability. Effective communicator and problem solver, eager to contribute to impactful projects. Seeking to advance technical expertise and collaborate with industry professionals in the field.

EXPERIENCE

Project Design & Analysis Participant

Sustainable Energy Corp 01/2026 - 08/2026 Austin, Texas

- Collaborated with team members to create detailed CAD drawings resulting in a 15% decrease in design errors.
- Conducted comprehensive data analysis that supported decision-making processes, enhancing project outcomes by 10%.
- Contributed to sustainability assessments, receiving positive feedback from senior engineers on environmental considerations.
- Active participation in project meetings, offering innovative suggestions for project efficiency and outcomes.
- Demonstrated strong interdisciplinary communication skills during coordination with engineers and project managers.

Research & Development Collaborator

EcoBuild Innovations 06/2026 - 12/2026 Houston, Texas

- Led project documentation efforts, producing clear reports and specifications, crucial for project planning phases.
- Executed field tests and collected data which were key for verifying project quality and ensuring accuracy.
- Learned and applied advanced engineering software, increasing project development efficiency by 12%.
- Exemplified adaptability and teamwork during diverse project tasks, contributing to a collaborative team atmosphere.

VOLUNTEERING

Environmental Conservation Volunteer

Texas Environmental Initiative

02/2025 - 05/2025

Contributed to local projects aiming at environmental preservation and sustainability.

- Assisted in organizing and conducting educational workshops on sustainable practices.
- Coordinated a team of 15 volunteers for tree planting activities across various local parks.
- Collaborated with community leaders to implement a recycling program at two major local events.

TRAINING / COURSES

AutoCAD Advanced Certification

Issued by AutoDesk, 2025.

Sustainable Engineering Practices

Texas Engineering Extension Service, 2025.

Project Management Fundamentals

Coursera, 2024.

EDUCATION

Bachelor's Degree in Mechanical Engineering

University of Houston

01/2022 - 01/2026 Houston, Texas

SKILLS

- AutoCAD Microsoft Office Suite
- Data Analysis Project Management
- Sustainability Practices
- Engineering Software Tools

INTERESTS

Innovative Engineering Solutions

Enthusiastic about contributing to projects that offer sustainable and forward-thinking engineering solutions.

Outdoor Activities

Enjoy hiking and exploring nature, connecting with the environment in meaningful ways.

Robotics and Automation

Fascinated by the potential of robotics to revolutionize industries and improve efficiency.
